KASHIMA COAT

Select shocks feature Genuine Kashima Coat. The distinctive gold color is backed by its high-performance properties that provide reduced friction, an exceptionally smooth feel and extreme durability.

QS3

(3 SETTING QUICK POSITION SWITCH)

Choose from three specifically calibrated ride control settings to tune in your own personal ride and handling setting. The QS3 supplies a wide range of adjustments while simply allowing the user to make a change quickly without tools.

REBOUND DAMPING

Rebound damping controls the rate at which the shock returns after it has been compressed. The proper rebound setting is a personal preference and changes with rider weight, riding style and conditions.

Mounting Track design allows you to easily slide a Utility Jug or Gear Bag on and off your tunnel. Raised mounting track keeps the gear away from your tunnel. Mounting tracks are made of HDPE plastic for durability plus resistance to snow and ice buildup. Heavy-duty Utility Jugs are UV-protected. Hard-sided Gear Bags are made of water-resistant polyester with a urethane-coated outer shell and feature padded foam lining. The Utility Jug and Gear Bag base slides easily onto the mounting track. Mounting Track, Utility Jugs and Gear Bags are sold separately.

NOTE: Utility Jugs are not intended for fuel storage.

TRACTION & CONTROL

MAXIMIZE STEERING CONTROL

The length of the turning carbide (carbide inserted directly under the steering spindle) is the determining factor on steering control. The longer the turning carbide, the more positive turning becomes. Too few studs with long turning carbides can result in the situation shown in Illustration 1 below.

MAXIMIZE TRACTION CONTROL

The quantity and types of studs inserted through the track can have several effects. If installed improperly, track and/or stud damage can result. If the pushing force from an excessive number of studs exceeds the ability of the steering to control the force, the effect could be like that in Illustration 2. In this case, the studs tend to "push" the skis in a straight line.

- 1 Back end loose. Too much carbide, not enough steering control.
- 2 Front end pushes. Weak steering from worn wearbars, turning carbides too short or overstudding on track.
- 3 Steering control and stud quantity are in balance for proper setup.

TUNE YOUR SLED'S HANDLING TO YOUR RIDING STYLE

Determining the proper traction and control is simple. What's your riding style: Are you a conservative trail rider or a performance trail rider? Look at the chart below. Find the line with the horsepower of your sled. Look under your riding category. Here you will find the number of studs and the length of the carbide wearbar you should use. This is a baseline guide for stud and wearbar selection. See your dealer for specific model applications.

STUD QUANTITY / INCHES OF TURNING CARBIDE

SLED	TRAIL	PERFORMANCE
50-75 HP	48/4 in.	48/6 in.
75-125 HP	102/6 in.	153/8 in.
125-150 HP	153/8 in.	153/10 in.
150-200 HP	153/8 in.	153/10 in.

FOR STUD PLACEMENT, USE AN ARCTIC CAT-APPROVED STUD TEMPLATE SHOWN ON PAGE 131.

Arctic Cat traction products are available in package quantities that will give you the best combinations for 129-in. and 137-in. tracks.

RECOMMENDED STUD LENGTH (IN.)

TRACK LUG HEIGHT	WOODY'S® STUD LENGTH	Stud Boy® STUD LENGTH
1.000	1.075	1.080
1.250	1.325	1.375
1.352	1.325	1.375
1.375	1.450	1.500
1.500	1.575	
1.600	1.575	

For stud lengths 1.325 in. and longer, we recommend the use of a Big Nut (page 130) or Power Tower Support Nut (page 130). Cobra 1.35-in. tracks have a standard lug height of 1.25 in. The overall lug height including the extended "towers" is 1.35 in. Because the towers will flex, Cobra 1.35-in. tracks use the same stud length as a 1.25-in. track.

CAUTION

- > To protect the tunnel from possible damage from the studs, it is recommended that a Tunnel Protector Kit be installed on those models not so equipped
- > A Short Snowflap is required when installing studs on '07-'09 F Series; '09 Z1, Z1 Turbo; '09-'11 Crossfire™ and CFR
- > See your dealer for additional information

STUD PLACEMENT

- > DO NOT use studs that are longer than recommended
- > DO NOT place studs in line with the heat exchanger or tunnel protector strip, and factor in the amount of suspension travel to avoid tunnel damage
- > Studs MUST NOT extend more than 3/8 in. beyond the rubber track lugs
- > Verify adequate clearance between the track, tunnel and heat exchanger to avoid serious damage
- > Confirm that your machine has adequate tunnel protection before installing studs
- > Use an Arctic Cat-approved Stud Template shown on page 131
- > The length of carbide and number of studs must coordinate to result in balanced handling and proper control

SINGLE RUNNER

- › Ideal on ice and hardpack, but works well anywhere
- › May provide a noted speed increase compared to a dual wearbar
- › Hardweld wearbars have a 7/16-in. host bar, carbide wearbars have a 1/2-in. host bar
- › Fits '05-'19 Arctic Cat Saddleless Skis
- › Sold in pairs

BELTS

- ▶ Custom fit to match each Arctic Cat sled and specific use
- ▶ Better contact with clutch surface and faster acceleration from double cogs
- ▶ Increased belt life by running cooler than aftermarket belts
- ▶ Premium reinforced with Aramax® aramid fibers for strength and durability
- ▶ Increased power transmission with less slip
- ▶ Kevlar® drive belts available for F, M, ZR and XF models, which dramatically extend belt life and sustain belt length better than traditional cords

NOTE: Proper break-in period required.

PREMIUM ARCTIC CAT “EXTENDED-LIFE” ORIGINAL EQUIPMENT REPLACEMENT BELTS

Don't settle for anything less than a drive belt built specifically for your sled. Proven through extensive lab and field testing, original equipment Arctic Cat replacement belts are precision-engineered for each Arctic Cat snowmobile.

CUSTOM-ENGINEERED FIT

While non-OEM aftermarket belts offer “one construction fits all,” Arctic Cat Research & Development custom engineers each genuine Arctic Cat belt to match the specific performance characteristics of your sled. This produces the best combination of strength, durability and responsiveness for lower-horsepower, fan-cooled sleds all the way up to high-horsepower muscle sleds. Each one is built using only state-of-the-art materials, incorporating precision manufacturing techniques to meet exacting tolerances.

TOP & BOTTOM COGS

Arctic Cat original equipment belts are double cogged, so more of the belt contacts the clutch surfaces. This results in faster acceleration, maximum efficiency and superb overall performance. Double-cog design provides structure while adding surface area for greater cooling and longer life. In fact, our belt runs cooler than flat-top aftermarket belts.

ARAMAX HIGH-MODULUS ARAMID-FIBER TENSILE MEMBER

The Aramax inner cord provides incredible strength and durability for high-horsepower, high-performance sleds. In addition, each belt is chemically treated for maximum power transmission and length stability.

HIGH-PERFORMANCE PREMIUM COMPOUNDS

Arctic Cat's OEM belts incorporate advanced “premium” compound materials that ensure optimum belt performance under all riding conditions. The advanced aramid-fiber-loaded rubber compound resists wear and delivers consistent power while minimizing slippage over a broad range of operating temperatures. The thicker, highly flexible design increases grip to clutch surfaces for increased power transmission.

ARCTIC CAT KEVLAR DRIVE BELTS

These ultimate-performance Arctic Cat Kevlar drive belts are custom engineered for F, M, ZR and XF models. Extended-life belts feature top- and bottom-molded cog construction and high-performance compounds. Inside, the Kevlar cord provides increased belt life. Please note that proper belt “break-in” is required.

2-STROKE OIL

C-TEC2™ SYNTHETIC OIL

The C-TEC2 revolutionary clean-burning engine technology demands an entirely unique oil formulation. This lubrication system effectively delivers oil where it is required — as a result using significantly less oil compared with traditional 2-cycle engines. This technology requires a unique viscosity and blend of additives and base stocks. After several years of intense testing, numerous formulations, thousands of dyno hours and hundreds of thousands of field test miles, we landed on this unique oil technology.

- ▶ The ONLY oil recommended for the C-TEC2 engine, but approved for ALL Arctic Cat 2-cycle engines
- ▶ Reduction in recoil pull-effort during cold weather starting
- ▶ Convenient C-TEC2 oil packaging provides easier pourability and less waste
- ▶ Fully synthetic formulation provides ultimate engine protection
- ▶ Detergent additives maximize Arctic Power Valve™ and engine cleanliness
- ▶ Smokeless formulation burns extremely clean with a fresher scent

WOODY'S LIMITED WARRANTY

International Engineering & Manufacturing, Inc. warrants each product manufactured by it to be free from defects in material and workmanship under use for the purpose for which it is intended. The Company shall not be liable for damage or delays caused by defective materials or workmanship; is limited to the repair or replacement at its factory of defective article or part thereof, which may be returned to the factory, transportation charges, prepaid within one (1) year after delivery to the original purchaser. Proof of purchase is also required. The Company shall be the sole judge of the existence of any defect in the article so returned. No claims for charges incurred in the removal, disassembly or reinstallation of such article shall be allowed. Product manufactured for consumer use on snowmobiles is designed for snow or ice only; use on any other surface voids warranty.

This Warranty shall not cover any article which has been misused or neglected or damaged by accident or any article which has been altered outside the Company's factory. The Warranty for studs is void unless the studs are installed with Woody's installation tools, support plates and lock nuts; following the directions in the installation instructions. This Warranty does not cover bending, chipping, flaking or carbide pin breakage or pin loss from stud wear, stud replacement labor or shipping.

The Company shall, in no event, be liable for consequential damage or contingent liability arising out of any total or partial failure to function of any article manufactured by it or of any equipment on or in which it is used. Failure of a user to give notice to claim as to defect claimed under the provisions of the Warranty within one (1) year after delivery to original use, such claim shall constitute a waiver by consumer of all claims with respect to goods and equipment. No express, implied, or statutory warranty other than that herein set forth is made or authorized to be made by the Company. All returned warranties will not be accepted without a return authorization number.

WOODY'S MANUFACTURER WARRANTY RETURNS

Call our customer service department for a Return Authorization Number. This number must be visible on the outside of the box. The product must be inspected by a Woody's technician to determine if the product is defective due to material, quality or workmanship before a final warranty determination is made. Proof of purchase is required. All returns to the manufacturer are for exchange only.

STUD BOY WARRANTY

Liberty Products, Inc. herein noted as The Company, warrants each article manufactured by it to be free from defects in material and workmanship under use for the purpose for which it is intended. The Company shall not be liable for damage or delays caused by defective materials or workmanship; is limited to the repair or replacement, at its factory; of any defective article or part thereof, which may be returned to the factory; transportation charges, prepaid; within 90 days after delivery

to the original user. Proof of purchase is also required. The Company shall be the sole judge of the existence of any defect in the article so returned. No claims for charges incurred in the removal, disassembly or reinstallation of such article will be allowed. Product manufactured for snowmobiling is designed for snow or ice only. Use on any other surface voids warranty. This warranty shall not cover any article which has been misused, neglected, or damaged by accident or any article which has been altered outside The Company's factory. The Company shall, in no event, be liable for consequential damage or contingent liability arising out of any total or partial failure to function of any article manufactured by it or of any equipment on or in which it is used. Failure of a user to give notice to claim as to defect claimed under the provisions of this Warranty within ninety (90) days of the appearance of such claim shall constitute a waiver by customer of all claims with respect to such goods and equipment. No express, implied, or statutory warranty other than that herein set forth is made or authorized to be made by Liberty Products, Inc.

Snowmobiling is serious fun. Be sure to read and understand your owner's manual and please pay special attention to the safety instructions. Arctic Cat Inc. endorses and encourages the safe use of all snowmobiles. Be careful, you can get hurt. Wear a helmet and don't drink and ride. Be aware of natural hazards you may encounter, allow yourself plenty of room to safely stop your snowmobile under all conditions, and maintain your equipment. Your safety is in your hands, so take care. All scenes depicted or described in this brochure were performed by professional riders under carefully controlled conditions. Leave the fancy riding to the pros; they practice for years and train very hard to make it look easy. Never attempt to duplicate these maneuvers or encourage others to do so. We care about your safety and enjoyment of the sport.
